

Mobile TAX Payment

Over the past years, Telecom operators have focused on introducing Mobile Money payment and transfer services, and most of them have actually built solid technical and distribution infrastructures to support deployment and usage of mobile financial services.

Mobile Tax Payment

In order to increase usage of their mobile financial services telcos have established partnerships with utility companies and other mass market service providers for bill payment services. In addition, some of them have launched tax payment in partnership with Taxation agencies.

Our Solution

Our Solution

- Increase the RGS 30 providing customers a new purpose to use mobile money services
- Increase revenue generated by mobile money transactions
- Provide a digital solution to businesses and individuals
- Enable tax returns and payments using Mobile digital wallets through the USSD application.

Subscriber simply need to dial the USSD code to :

- Register a valid Unique Identification Number (UIN)
- Make declaration with the registered Unique Identification Number (UIN)
- Create a business activity
- Carry out any payments
 - Tax returns
 - Digital stamps

Reporting

Reporting

Reporting is made available in an agreed format (XML, Excel file, CSV, TXT and JSON), and can be configured to reflect any data, like :

- Number of subscribers who dial the service short code
- Number of payment on daily/weekly and monthly basis
- Number of declaration done on daily/weekly and monthly basis
- Total amount spent per day/week and month for the service
- Total revenue generated per day/week and month by the service
- Number of transaction on the service per day / week and month
